MARIKA GUARDI

<Full Stack Web Developer/>

ABOUT ME

I completed a Full Stack course and consider myself a versatile developer, a quick learner, and someone who uses AI as a practical support tool in my work. I have built several projects using stacks beyond those covered in the course, and I am now looking for a professional environment where I can grow and further specialize as a developer.

PROJECTS

kāma

I'm the founder of kāma, a fully customizable website, suitable for any kind of business, that can be managed from the own dashboard (editing prices, descriptions, products, pictures, offers, events, links to social media and booking apps...)

Used Stack: Laravel + Blade & Bootstrap + Vanilla JS

Database SQLite - Google Translate API

Link: <https://kama-web.com>

Examples:

searesidence.kama-web.com

tattooshop.kama-web.com

Swipe Cleaner

An app to clean the smartphone photo gallery with a swipe (left: "Keep it", right: "Delete it"). Pictures marked for deletion are added to a list that requires confirmation before being permanently deleted.

Used Stack: React Native - Typescript - Expo Platform

Link: <https://tinyurl.com/SwipeCleanerApk>

CodeX Streaming

Online streaming website simulation with admin dashboard.

Test it as **admin** with **admin@codex.com** or as **user** with **user@codex.com** and using **password123** as **password** to access all content and features.

Used Stack: Angular + Laravel + Database MySQL

API Restful Bearer Token + JWT Token SHA512

Link: <https://www.aurwebdev.com/>

Coin Farm

Coin Farm is an interactive arcade game developed, in which the player must collect coins while avoiding obstacles.

Used Stack: Html, Css, Javascript Vanilla

Link: <https://coinfarmgame.netlify.app>
